naturmega®

Smart lipids. Trusted science. Global impact.

Lipid Science Innovation for Health & Nutrition Brands

naturmega®

A Trusted Global **Lipid Partner**

Nearly two decades partnering with premium wellness brands to transform lipid science into meaningful innovation.

Why Brands Choose **Naturmega**

- Science-driven innovation
- Pharmaceutical-inspired execution
- Collaborative product development
- Responsive nearshore partnership

Purpose in Action

- We believe better lipid science creates better wellness products.

Pioneers in Omega-3 Excellence

That's why we've continuously invested in purification technologies, clinical capabilities, application development and next-generation lipid platforms.

The Omega-3 Journey

The future of Premium Omega-3 is smarter delivery, not just more.

The omega-3 market has always faced volatility in supply and prices, driven by raw material availability and global factors. Yet the category has continued to adapt, innovate and grow.

One Company. Two Complementary Ways of Creating Value.

Helping brands succeed today while shaping the future of omega-3.

Essential Solutions

Powering today's
leading omega-3
products through:

-  Better tasting formats
-  Advanced concentrates
-  Alternative Sources
-  Supply flexibility
-  Technical partnership

**THE FULL SPECTRUM OF
OMEGA-3 INNOVATION,**
One trusted partner.

Next-Generation Solutions

Creating tomorrow's
premium omega-3
categories through:

-  Advanced Lipid Science
-  Clinical science
-  Proprietary technologies
-  Branded ingredients

One Company. Two Complementary Ways of Creating Value.
Breadth of Lipid Technologies

OMEGA-3 INNOVATION,
One trusted partner.

Next-Generation Solutions

Customer Brands
around the world

Responding to the New Supply Reality

Combining marine and algal omega-3 sources to build a more resilient future for omega-3 nutrition.

Where Marine and Algal Science Meet

Not fish oil. Not algal oil.

The best of both worlds.

dualisTM
Dual-Origin Omega-3 Technology

The evolution of omega-3 sourcing.

As climate events like El Niño disrupt anchovy seasons and brands demand more sustainable sourcing, Dualis™ blends fermentation-derived algal oil with marine concentrates — decoupling supply from wild-catch cycles while stabilizing long-term pricing.

Supply Resilience

Fermentation-derived algal oil is independent of fishing seasons and ocean weather patterns.

Price Stability

Less exposure to fish-oil spot volatility, enabling predictable long-term B2B pricing.

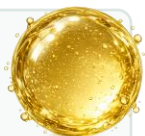

Sustainability

Plant-derived, vegan-compatible omega-3 for clean-label and ESG-aligned positioning.

INITIAL PORTFOLIO — IN ACTIVE DEVELOPMENT

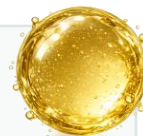

33/22

300 EPA / 200 DHA · EE or TG

400/300

400 EPA / 300 DHA · EE

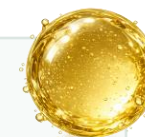

150/500

150 EPA / 500 DHA · EE or TG

Custom

Tailored EPA/DHA ratios

How it's made: fermentation-derived algal oil blended with marine (fish-oil) concentrates.

A New Vision for Premium Omega-3

BeyondKrill™

We believe the future of premium omega-3 goes beyond conventional krill.

-  More phospholipids.
-  Smarter delivery.
-  Greater flexibility.
-  Shellfish-free.
-  Science-driven differentiation.

SUPRIA[®] X2™

The first branded ingredient built on the BeyondKrill™ vision.

The next opportunity isn't replacing krill, It's building on the premium territory krill created.

Not dependent on marine sourcing or krill harvesting

2× the phospholipid omega-3 strength vs. conventional krill oil products*

Designed for next-generation premium formulations

* EPA + DHA – Bonded Phospholipids determined by internal analytical methods based on chromatography and NMR
